This design was inspired by both French classical, country and modern design elements. Working with Michelle on the ORC has been both inspiring and has pushed us to our creative extremes.

The decorative carved designer solid wood legs support a solid engineered wooden desk top highlighting stunning cathedral grain, streamline skirting trim that supports the drawers and keyboard storage.

3 drawers each side to support my clients specific request including an 18" solid brass butler drop hinge keyboard drawer and two further large 20" drawers that blend seamlessly recessed into the discreet large stunning desk top. The natural wood color and grain is retained and finished inside the drawers. The antique brushed brass bureau handles balance the classic french style trim with renaissance 16th century inspired dentil style end moulding. This offers both a subtle touch of elegance and sophistication.

All hand crafted and finished in an aged antique glaze, a diamond coated protective sealant this desk is crafted and designed to both elevate any space and inspire the user in their creativity and work.

It has been an absolute pleasure working with Michele and her team and seeing how hard she works as she carefully and meticulously brings all her design elements together in her projects.

RUMO Design Studio is delighted to be involved in this ORC and offers a one of a kind unique piece of furniture:

The Luxe bureau d'écriture
(Luxury writing desk)

36" w x 74" l x 30" h

Starting from \$3,400.00
